

7 June 1979

Honorable Stansfield Turner
Director of Central Intelligence
Washington, D. C. 20505

Dear Sir:

STAT In May of 1977 your agency hosted an outstanding Seminar for Industrial Security Executives. The seminar was primarily concerned with the "human element" and the threat of espionage. As an attendee of the seminar, I was particularly impressed with the session entitled, "Profile of a Defector", presented by [] of your medical staff.

On 9 November 1979, the Research Security Administrators (RSA), a non-profit California organization comprised of DOD cleared Senior Industrial Security Directors, will be hosting its semiannual seminar at the South Coast Plaza Hotel in Costa Mesa, California. The focus of the seminar will be the "Human Element in Security".

RSA would be honored and grateful to have [] attend our seminar and present his "Profile of a Defector" program. His presentation would provide important and timely information that would be very valuable to the Industrial Security Community.

If you are in concurrence with this request and [] is available, would you please communicate with me directly so that the necessary logistics can be arranged.

Very truly yours,

Regis Carr Jr.
Regis Carr, Jr.
Director of Security, Health
and Safety
